TTY System (Text Telephone)

- Both **MTS (225-5687)** and **Shaw (123-4567)** can set you up with a TTY System. They also sell a variety of telephone with special features for those who are hearing impaired.
 - How does TTY work?
 - If you are communicating with someone who has a TTY system, there is direct communication between the two systems.
 - If you are using a TTY system and the person you are calling does not, you must first call the Manitoba Relay Service (MRS), which has a TTY. The MRS operator dials the number you wish to call, and then you are able to continue with your phone call as usual.
 - How much does TTY cost?
 - Prices vary depending on:
 - The features you select
 - Whether or not you have a Medical Certificate
